- Optimized security for backend, performance and mobile experience
- Ensured responsive layout and performance across devices and screen sizes

Tech stack:

MERN Stack (MongoDB, Express Js, React, & Node Js), TailwindCSS, Motion, Swiper Js, Axios, Middleware, etc

College Info

07/2025 – 09/2025

The website collegeinfoweb.site is a platform designed to provide comprehensive information about universities, offering details on institutions, educational resources, and updates related to higher education.

<https://collegeinfoweb.site> 

- Provides detailed insights into universities, programs, scholarships, and campus life
- Built-in CMS (Content Management System)
- Personalized Recommendations by Profile
- Behavior-Based Recommendations
- Facilitates interaction and shared decision-making between students and their parents within the platform.
- Responsive, modern UI that ensures smooth navigation across devices.

Tech stack:

React, Tailwindcss, Motion, Firebase, and Swiper Js

Seasearch Asia

A clean and responsive one-page website built for Seasearch Asia based on a Figma design. Focused on delivering a fast, mobile-friendly, and SEO-optimized experience.

<https://seasearch.asia> 

- Built with semantic HTML5 for improved SEO and accessibility
- Fully responsive layout using TailwindCSS utility classes
- Smooth scroll and sticky navigation implemented with vanilla JavaScript
- Optimized for performance with image lazy loading and asset minification

Tech stack:

HTML, TailwindCSS and Javascript

Interskill

A modern e-commerce platform focused on online education in Indonesia. Built as part of a development team, using a UI/UX design provided via Sketch.

<https://www.interskill.id> 

- Contributed to front-end development using React.js and TailwindCSS
- Integrated Progressive Web App (PWA) features for offline support and mobile-first experience
- Configured Webpack for custom builds and performance optimization
- Implemented OpenGraph meta tags for better link previews and social media sharing
- Collaborated closely with UI/UX and back-end teams to ensure smooth integration

Tech stack:

React Js, TailwindCSS, PWA, Webpack and OpenGrap

Intervisual

A company website for a home construction and interior design business, focused on clean design, SEO, and browser compatibility. Developed as part of a front-end team.

<https://intervisual.co.id> 

- Built with semantic HTML and optimized CSS for SEO and responsive layout
- Used Modernizr to ensure cross-browser compatibility and feature detection
- Integrated jQuery and Core JS for smooth interactivity and DOM manipulation
- Implemented Google reCAPTCHA for enhanced form security
- Contributed to front-end coding, debugging, and deployment preparation

Tech stack:

HTML, CSS, Javascript, Modernizr, jQuery and Core Js

Isibangunan

An official company website for a premium building materials importer in Indonesia. Showcases a wide range of imported products such as vinyl flooring, marble, granite, ACP panels, 3D wallpapers, and wall panels.

<https://isibangunan.com> 

- Contributed to the Product section using WordPress and Elementor
- Managed and styled product listings with WooCommerce integration
- Optimized pages for search engines using Yoast SEO best practices
- Ensured a user-friendly layout and mobile responsiveness
- Collaborated with the content and marketing teams to maintain accuracy and consistency

Tech Stack:

Wordpress, Elementor, WooCommerce and Yoast SEO

PT. CRT Kabelita

A corporate website for an automotive wire harness and tubing manufacturer. Developed based on a Figma design with a focus on animations, responsiveness, and content integration.

<https://crtkabelita.com> 

- Translated Figma design into fully responsive React components using TailwindCSS
- Integrated interactive sliders using Swiper and animation effects with GSAP & Framer Motion
- Connected the blog section dynamically with WordPress as a headless CMS
- Optimized for performance and mobile experience
- Collaborated with designers and back-end developers to meet project requirements

Tech Stack:

React Js, Tailwindcss, Swiper, Motion, and GSAP

Aisikai

A multilingual, responsive website for AISIKAI, a global leader in electrical product R&D and manufacturing. Developed with a focus on modern UI, product clarity, and global reach

<https://www.aisikai.co.id> 

- Built using React.js and TailwindCSS for a clean, modular, and scalable front-end
- Integrated Swiper.js for interactive product carousels and content sliders
- Ensured responsive layout and performance across devices and screen sizes
- Contributed to front-end development based on structured design systems and corporate branding
- Helped communicate complex technical product information with a user-friendly interface

Tech stack:

React Js, Tailwindcss, and Swiper

PT Dua Sisi Sejahtera

07/2025 – 07/2025

A responsive corporate website for PT Dua Sisi Sejahtera, designed to showcase company profile and HR outsourcing services, while providing an integrated job application system that allows candidates to apply and submit resumes easily

<https://www.duasisejahtera.com> 

- Job Application System
- Fully optimized for desktop, tablet, and mobile devices to ensure seamless access
- Showcases company information, outsourcing solutions, and HR services offered
- Dedicated section for job listings and career development information
- Clean layout and intuitive structure for easy browsing
- Built-in contact form and communication channel for potential clients and job seekers
